## b-type platform lift

### stylish and reliable solution

a simple screw and nut driven lifting platform for mainly external applications. The B-Type can also be installed internally, travelling a maximum of 2m. With its open design covered by toughened and laminated glazed panels, it provides a stylish and reliable platform lift solution.

### no pit required

the B-type platform lift doesn't require a pit as the platform lift comes with an internal ramp.

### operation

"Saloon" type doors allow easy access to the platform. Control buttons are easy to handle for the operator with hold-to-run operation

### safety first

safety is of the utmost importance for the open type platform lift. A safety plate covers the whole underside of the platform, if the plate is touched the lift stops immediately.
